			1644	

DATE MAILED: 02/26/2004

Please find below and/or attached an Office communication concerning this application or proceeding.

10D

Office Action Summary	Application No. 10/087,144	Applicant(s) WABL ET AL.	
	Examiner Phuong Huynh	Art Unit 1644	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE One MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 01 March 2002.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-22 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☐ Claim(s) _____ is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☒ Claim(s) 1-22 are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

I. The location of your application in the PTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Art Unit 1644, Group 1640, Technology Center 1600.

II. Claims 1-22 are pending.

Election/Restrictions

III. Restriction to one of the following inventions is required under 35 U.S.C. 121:

1. Claims 1-3, drawn to a method of identifying an agent that reduces a **level of a SWAP-70 polypeptide** in mast cell, classified in Class 435, subclass 7.92.
2. Claims 5-6, drawn to a method of identifying an agent that reduces the **interaction** of a SWAP-70 polypeptide with a SWAP-70 interacting protein by **contacting eukaryotic cell** with a test agent, classified in Class 435, subclass 7.92.
3. Claim 7, drawn to a method of identifying an agent that reduces the **an enzymatic activity** of a SWAP-70 polypeptide by **contacting eukaryotic cell** with a test agent, classified in Class 435, subclass 6.
4. Claim 8, drawn to a method of identifying an agent that reduces **mast cell degranulation** of a SWAP-70 polypeptide by **contacting eukaryotic cell** with a test agent, classified in Class 435, subclass 7.72.
5. Claims 10-11, drawn to a method of identifying an agent that reduces an **interaction** of a SWAP-70 protein with a SWAP-70 interacting protein other than SWAP-70 by **contacting a SWAP-70 polypeptide** with a test agent, classified in Class 435, subclass 7.93.

6. Claim 12, drawn to a method of identifying an agent that reduces an **enzymatic activity** of a SWAP-70 protein by **contacting a SWAP-70 polypeptide** with a test agent, classified in Class 435, subclass 7.93.
7. Claims 13-14, drawn to a method of identifying an agent that inhibits **phosphorylation** of a SWAP-70 protein, classified in Class 435, subclass 7.1.
8. Claims 15-16, drawn to biological active agent and a pharmaceutical composition comprising said agent wherein the agent reduces a **level of a SWAP-70 polypeptide**, classified in Class 424, subclass 184.1.
9. Claims 15-16, drawn to biological active agent and a pharmaceutical composition comprising said agent wherein the agent reduces a **interaction** of a SWAP-70 polypeptide with a SWAP-70 interacting protein, classified in Class 424, subclass 184.1.
10. Claims 15-16, drawn to biological active agent and a pharmaceutical composition comprising said agent wherein the agent reduces an **enzymatic activity** of a SWAP-70 polypeptide, classified in Class 424, subclass 184.1.
11. Claims 15-16, drawn to biological active agent and a pharmaceutical composition comprising said agent wherein the agent reduces **Mast cell degranulation** of a SWAP-70 polypeptide, classified in Class 424, subclass 184.1.
12. Claims 15-16, drawn to biological active agent and a pharmaceutical composition comprising said agent wherein the agent reduces **phosphorylation** of a SWAP-70 polypeptide in mast cell, classified in Class 424, subclass 184.1.
13. Claims 17-19, drawn to an isolated mast cell, classified in Class 424, subclass 93.7.
14. Claims 20-22, drawn to a method of inhibiting Mast cell degranulation or a method of treating a specific disorder associated with Mast cell degranulation, classified in Class 424, subclass 184.1.

Liking claim 4 will be examined along with Groups 2-4 if any one of Groups 2-4 is elected.

Liking claim 9 will be examined along with Groups 5-6 if any one of Groups 5-6 is elected.

The inventions are distinct, each from the other because of the following reasons:

Inventions of Groups 1-7 and 14 are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, the methods as claimed differs with respect to their method steps and endpoints. Therefore, they are patentably distinct.

Inventions of Groups 8-13 are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, the products as claimed differs with respect to their structures and physiochemical properties. Therefore, they are patentably distinct.

Inventions of Groups 8-13 and Groups (1-7 and 14) are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the products as claimed can be used in treating different disease as claimed or materially different process such as binding assays, and identifying compound. Therefore, they are patentably distinct.

IV. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and/or recognized divergent subject matter. Further, even though in some cases the classification is shared, a different field of search would be required based upon the structurally distinct products recited and the various methods comprising the distinct method steps. Further, a prior art search also requires a literature search. It is an undue burden for the examiner to search more than one invention. Therefore restriction for examination purposes as indicated is proper.

Art Unit: 1644

V. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

VI. The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and a product claim is subsequently found allowable, withdrawn process claims that depend from or otherwise include all the limitations of the allowable product claim will be rejoined in accordance with the provisions of MPEP § 821.04. **Process claims that depend from or otherwise include all the limitations of the patentable product** will be entered as a matter of right if the amendment is presented prior to final rejection or allowance, whichever is earlier. Amendments submitted after final rejection are governed by 37 CFR 1.116; amendments submitted after allowance are governed by 37 CFR 1.312.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103, and 112. Until an elected product claim is found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowed product claim will not be rejoined. See "Guidance on Treatment of Product and Process Claims in light of *In re Ochiai*, *In re Brouwer* and 35 U.S.C. § 103(b)," 1184 O.G. 86 (March 26, 1996). Additionally, in order to retain the right to rejoinder in accordance with the above policy, Applicant is advised that the process claims should be amended during prosecution either to maintain dependency on the product claims or to otherwise include the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.

VII. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phuong Huynh "NEON" whose telephone number is (571) 272-0846. The examiner can normally be reached Monday through Friday from 9:00 am to 5:30 p.m. A message may be left on the examiner's voice mail service. If attempts to reach the examiner by telephone

Art Unit: 1644

are unsuccessful, the examiner's supervisor, Christina Chan can be reached on (571) 272-0841.
The IFW official Fax number is (703) 872-9306.

VIII. Any information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
